Manuals of Interest to Designers
of Timber Structures

Wood structures--A Design Guide and Commentary was prepared by the Committee on Wood of the American Society of Civil Engineers and provides practicing engineers and designers with a state-of-the-art in wood engineering. It is available for \$12 (\$6 for ASCE members) from the American Society of Civil Engineers, 345 East 47th Street, New York, N.Y. 10017.

For specific design procedures, designers of engineered timber should consult the Timber Construction Manual (2d ed.) prepared by the American Institute of Timber Construction. This manual provides data for design and construction application for use by those familiar with engineering procedures and is available from Wiley-Interscience, P.O. Box 4569, Grand Central Station, New York, N.Y. 10017, for \$15.
